

**Pro-Keto Dry**

## Why do cows benefit from Farm-O-San® Pro-Keto Dry?

Farm-O-San Pro-Keto Dry is a dietetic complementary feed for high performing dairy cows for the reduction of the risk of ketosis. Farm-O-San Pro-Keto Dry contributes to a good start of lactation.

As a consequence of the higher energy requirement, a limited dry matter intake and roughage around parturition, dairy cows can be sensitive to acetonemia.

Farm-O-San Pro-Keto Dry includes all essential ingredients for a good start to lactation. Glycogenic energy is provided in the form of flavoured chicory pulp with propylene glycol. Chicory contains inulin, a fructo-oligo saccharide consisting mainly of beta (2-1) fructosyl-fructose links. Inulin has long been associated with the maintenance and support of a healthy gut flora. Niacin and vitamin B12 improve energy utilisation. Choline chloride contributes to a normal functioning of the liver.

# Pro-Keto Dry

## General information

Type of product:	Dietetic feed for dairy cows
Packaging:	Bag containing 25 kg
Shelf life:	12 months
Storage conditions:	Store in a cool, dark and dry place in sealed packaging
